Star Vault AB: Second in Best Graphics and Most Anticipated

One of the largest gaming site for massively multiplayer online games, Mmosite.com, has concluded a competition with gamers voting for different games. Mortal Online, Star Vaults first game title to be released summer 2009, came in second in both categories that it was nominated for.

- **Best Graphics**

Definition: "By graphics, we mean the game that carries the most visual appeal and aesthetic quality in its appearance and presentation; including a game's model, texture design, animation quality, presentation, style, etc. Graphics weighs heavily in a game's quality."

- **Most Anticipated**

Definition: "Every year, numerous new games push into the market; every year, new types of gameplay keep coming out. Which title you wanna try out the most? Vote for it!"

"We were first very happy that we were nominated, but of course even happier that we came in second in both categories – thank you all gamers that have voted for us!" says Henrik Nyström, CEO Star Vault AB

Mortal Online forum has 7000 members and has been visited by over 300 000 unique visitors from 185 countries, since the start in early 2008. The fans that are registered are very active and give the development team support in decision-making for key features in Mortal Online, which is very much appreciated by the Star Vault Team.
